

AXMK-PE

XLPE insulated and PE sheathed power cables, rated voltage 0,6/1 kV

APPLICATION

In earth, ducts, on support brackets, in dry and wet conditions etc., where one does not expect mechanical damages and the cables are not exposed to the mechanical tensile load. In urban networks, industrial plants, power plants and other electricity consumers and for connection of control devices in industry, traffic etc.

CONSTRUCTION

Conductors: Al, class 1 or class 2 according to EN 60228, annealed

Insulation: XLPE compound

Bedding: Extruded filling compound or plastic tape

Outer sheath: PE compound, UV resistant

TECHNICAL CHARACTERISTICS

CPR class: Fca

Test voltage: 4 kV AC, 50 Hz, 5 min.

Rated voltage: 0,6/1 kV AC (1,5 kV DC)

Min. bending radius: multicore- 10D, D – overall diameter

Min. laying temperature: -15°C

Max. conductor operating temperature: 90°C

Max. short-circuit temperature: 250°C

Environment operating temp.: -35°C to +3

Core marking: acc. to HD 308 S2

4-core: Green/Yellow, Brown, Black, Gray or Blue, Brown, Black, Gray

5-core: Green/Yellow, Blue, Brown, Black, Gray or Blue, Brown, Black, Gray, Black
Or by customer request

STANDARD

HD 603 S1, SFS 4879

Basic assumptions for current carrying capacity

The maximum permissible conductor temperature in continuous operation is:

- XLPE insulated power cables in ground: +65°C
- XLPE insulated power cables in air: +70°C
- XLPE insulated power cables in air +90°C in special conditions that the surface of the cables does not exceed the temperature of +90°C in fire risky conditions

In ground installations the basic assumptions are:

- Temperature of ground: +15°C
- Depth of laying: 0,7 m
- Thermal resistivity of soil: 1,0 K.m/W

In air installations the ambient temperature is +25°C

Current carrying capacity of 2 or more core 0,6/1 kV Aluminium power cables (maximum conductor temperature: +70°C)

Cross-section of Al conductor	Permissible current rating (A)		
	In air / Method of installation		In ground
	A	C	
16	43	62	78

185	185	274	330
240	219	323	375
300	257	372	430

Method A of installation: a cable in a conduit in thermally insulated wall (see reference method A of HD 60364-5-52)

Method C of installation: a cable in a wooden wall (see reference method C of HD 60364-5-52)

In ground: a single cable laid directly into ground, see basic assumptions above.

Current carrying capacity of 3 single-core 0,6/1 kV power cables in air
