

AXQJ, IFSI AI, AXCMK-HF

XLPE insulated and HFFR sheathed power cable with Cu concentric cond., rated voltage 0,6/1

APPLICATION

Aluminum power cable designed for permanent installation both indoors and outdoors. Suitable for direct burial in the ground. The conductor insulation must be protected against ultraviolet (UV) exposure. All installation work must comply with applicable national standards and regulations. This cable is halogen-free and exhibits flame-retardant properties, classified under CPR as Dca-s1,d2,a1.

CONSTRUCTION

Conductors: Al, class 2 according to EN 60228

Insulation: XLPE compound

Bedding: Extruded elastomere or plastomere compound or plastic tape

Concentric conductor: Cu wires with counter helix of Cu tape

Sheath: HFFR compound

CORE IDENTIFICATION

According to HD 308 S2

Insulation Color:

3-core (b): ● Black ● Brown ● Grey

4-core (b): ● Blue ● Brown ● Black ● Grey

Outer Sheath Colour:

● Black

Other colours available on request

TECHNICAL CHARACTERISTICS

CPR class: Dca – s1,d2,a1

Test voltage: 4 kV AC, 50 Hz, 5 min. per core

Rated voltage: 0,6/1 kV

Min. laying temperature: -15°C

Min. working temperature: -40°C

Max. cond. operating temp.: 90°C

Max. short-circuit temperature: 250°C

Bending radius (min): single-core- 20D;
multicore- 16D, D – overall diameter

Min. bending radius during installation:
single-core- 10D; multicore- 8D

Fire properties: IEC 60332-1-2; IEC 60332-3-24
IEC 61034-2; IEC 60754-1
IEC 60754-2

STANDARD

SFS 5546; HD 604 S1, P. 51; SS 424 14 18;
IEC 60502-1

CERTIFICATION

Basic assumptions in ground installations are:

- temperature of ground: +15°C
- depth of laying: 0,7 m
- thermal resistivity of soil: 0,7 K m/W

In air installations the ambient is +25°C

*Method A of installation: a cable in conduit in a thermal insulated wall (see reference method A2 in IEC 60364-5-52)

**Method C of installation: a cable on a wooden wall (see reference method C in IEC 60364-5-52)
