

MCMK

Screened power cable 0,6/1 kV with Cu conductors, PVC insulated and sheathed

APPLICATION

Distribution power cable for static outdoor application (with protection against direct UV-irradiation), in ground, within facilities, in cable canals, in concrete, in conditions where there is a risk of potential mechanical damages, but where the cable is not exposed either to continuous mechanical stress or heavier tensile load. Used in power plants, transformer stations, industrial plants, metropolitan networks and other industrial areas.

Concentric conductor can be used as neutral, protective or earthed conductor. Simultaneously, this is also permitted to apply as a screen for example earth-connected protection against contact. Design of concentric conductor enables multiple cable connections without cutting the conductor.

TECHNICAL CHARACTERISTICS

CPR class (acc. to EN 13501-6): Eca

Test voltage: 4 kV AC, 50 Hz, 5 min.

Rated voltage: 0,6/1 kV

Bending radius (min): single-core – 15D; multi-core – 12D, D – overall diameter

Min. laying temperature: -15°C

Max. conductor operating temperature: 70°C

Max. short-circuit temperature: 160°C

Working temperature range: -35°C to 70°C

Flame retardant: EN 60332-1-2

CONSTRUCTION

Conductors: Cu, class 1 or 2 according to EN 60228

Insulation: PVC compound, type DIV 6

Bedding: Extruded filling compound or plastic tape

Concentric conductor: Copper wires and copper tape helically (spirally) applied

Sheath: PVC compound DMV 5

STANDARD

SFS 4880, HD 603 S1, p.3F, IEC 60502-1

CORE IDENTIFICATION

According to HD 308 S2

Insulation Color:

2-core: ● Brown ● Blue

3-core (a): ● Green/Yellow ● Brown ● Blue

3-core (b): ● Black ● Brown ● Grey

4-core (a): ● Green/Yellow ● Brown ● Black ● Grey

4-core (b): ● Blue ● Brown ● Black ● Grey

5-core: ● Green/Yellow ● Blue ● Brown ● Black ● Grey

Outer Sheath Colour:

● Black

Other colours available on request
